Investment Advisor

**STATE STREET
GLOBAL ADVISORS®**

- State Street Global Advisors Ireland Limited (SSGA) is the investment management business of State Street Corporation and one of the world's largest investment managers.
- SSGA acts as investment advisor to New Ireland for the Pension Managed Fund.
- SSGA provides strategic investment recommendations on the allocations of the fund to the underlying investment assets. SSGA also manages the underlying assets in which the fund invests.

The Pension Managed Fund is an investment fund that gives investors exposure to a diversified mix of equities, bonds, property and cash.

Diversification

Investments are spread across different asset classes: equities, property, bonds and cash. In addition, the fund invests across different geographic regions and different sectors. The percentage of the fund invested in individual assets is driven by the asset managers' outlook for individual stocks and the global economy.

Asset Mix*

Equities

The Pension Managed Fund aims to invest in large, quoted companies, across a diverse range of sectors, countries and geographic regions. The balance of the asset mix is held in property, bonds and cash.

Property

The Pension Managed Fund typically invests in quality commercial properties with tenants, in Ireland, UK and mainland Europe.

Bonds

The fund also typically invests in investment grade government and corporate bonds. This is used to provide a steady flow of income to the fund. Bonds typically experience lower levels of volatility and this helps to reduce the overall risk within the fund.

Cash

Cash exposure is invested in a top-rated liquid cash fund.

Minimum Recommended Investment Period

Investing should always be considered over the medium to long-term (typically, 5-7 years or more) so as to give the underlying assets time to grow in value. However, even long-term investing involves risk as values will fluctuate over time.

Risk Rating – Medium to High Risk

New Ireland has rated the Pension Managed Fund a medium to high risk pension investment fund. Funds categorised as medium to high risk pension funds have the following characteristics - they aim to generate a return higher than deposits and inflation. They typically invest significant proportions in assets such as equities, property and alternatives (e.g. commodities). They usually hold smaller amounts in lower risk assets such as government bonds and investment grade corporate bonds. Within these asset classes risk can be reduced by investing across sectors and geographic regions. Investors' capital is not secure and can fluctuate, sometimes significantly, and investors may get back less than they originally invested.
